

Golf

Most golfers will understand that the long term exposure to the elements involved in the average 18 hole round of golf can lead to accumulated damage to the skin and eyes. We would like to advise you of the need for adequate eye protection from damaging ultra-violet rays during this leisure activity.

We now stock an expanded range of sunglasses, with *Revo*[™] and *Mako*[™] now designing ultra-lightweight sunglasses and sunglass shields especially for the golfer. *Bolle*[™] have sunglasses with **Eagle Vision**[™] a brown tinted lens to enhance the contrast of the white golf ball against the blue sky and green fairway. This allows for more precise distance estimation and better tracking of the golf ball in flight. The wrap around style lens gives full side protection and the frames are lightweight with slip resistant nose pads, giving maximum comfort.

If you are having problems with your glasses slipping a sports strap may be the answer, or removeable silicone curl grips behind the ears.

Buck & Todd offer the "*Trial sunglass promotion*" which offers one day of free wearing of any pair of sunglasses to credit card holders. The credit card is debited via **eftpos**[™] allowing the holder 24 hours sunglass trial. If the trial pair meets satisfaction or is not returned, or returned damaged, the credit card transaction proceeds. However if the chosen pair is not to your liking another pair may be trialled or your account recredited via **eftpos**[™]. Should you have any queries about these sunglasses or other services that may benefit you, please call in.

P.S. All sunglass sales receive a lifetime of free servicing and adjustments. Our professional advice is complementary.
