

BUCK & TODD
OPTOMETRISTS

Laser Refractive Surgery.

At Buck & Todd optometrist we have seen a lot of patients who have had lasik surgery done and who have been very happy about the results. We have advised other patients they were not suitable and have referred some patients who were borderline suitable for Lasik who were rejected by the lasik surgeons due to likely risk of complications.

We take every endeavour to provide you with the best possible advice and information when you seek laser vision correction. However there are lots of issues we may not have time to discuss and we suggest you investigate the possible complications with Lasik at the following web sites.

<http://www.lasikcomplications.com/> esp. the pictures and the top 10 reasons not to.
